## **“INDIAN ECONOMY: OPPORTUNITIES AND CHALLENGES”**

The economy of India is the sixth-largest in the world measured by nominal GDP and the third-largest by purchasing power parity (PPP). The country is classified as a newly industrialised country, and one of the G-20 major economies, with an average growth rate of approximately 7% over the last two decades. India's economy became the world's fastest growing major economy in the last quarter of 2014, surpassing the People's Republic of China. However, the country ranks 141st in per capita GDP (nominal) with \$1723 and 123rd in per capita GDP (PPP) with \$6,616 as of 2016.

The long-term growth prospective of the Indian economy is positive due to its young population, corresponding low dependency ratio, healthy savings and investment rates, and increasing integration into the global economy. The Indian economy has the potential to become the world's 3rd-largest economy by the next decade, and one of the two largest economies by mid-century. The International Monetary Fund (IMF) described the Indian economy as the "bright spot" in the global landscape. India topped the World Bank's growth outlook for the first time in fiscal year 2015–16, during which the economy grew 7.6%. Growth is expected to have declined slightly to 7.1% for the 2016–17 fiscal year. According to the IMF, India's growth is expected to rebound to 7.2% in the 2017–18 fiscal and 7.7% in 2018–19.

India has one of the fastest growing service sectors in the world with an annual growth rate above 9% since 2001, which contributed to 57% of GDP in 2012–13. India has become a major exporter of IT services, Business Process Outsourcing (BPO) services, and software services with \$167.0 billion worth of service exports in 2013–14. This is the fastest-growing part of the economy. The IT industry continues to be the largest private-sector employer in India. India is the third-largest start-up hub in the world with over 3,100 technology start-ups in 2014–15. The agricultural sector is the largest employer in India's economy but contributes to a declining share of its GDP (17% in 2013–14). India ranks second worldwide in farm output. The industry sector has held a steady share of its economic contribution (26% of GDP in 2013–14). The Indian automobile industry is one of the largest in the world with an annual production of 21.48 million vehicles (mostly two and three wheelers) in 2013–14. India had \$600 billion worth of retail market in 2015 and one of world's fastest growing e-commerce markets.

## **VISION**

The college vision to provide quality education to the students coming from poor and backward family of the rural area so that perfect citizens are made to serve the society and country for a better future.
