“WOMEN EMPOWERMENT: A LEAP BY THE PSYCHOLOGICAL WINGS”

Women empowerment refers creation of an environment for women where they can make decisions of their own for their personal benefit as well as for the society. It also refers to increasing and improving the social, economic, political and legal strength of the women to ensure equal right to women and to make them confident enough to claim their rights such as:

Women may be empowered through creating safe work place, enhancing education, raising voice against gender equality, vocational training and by creating more part time job opportunity.

We see some common challenges of women empowerment like high level of domestic responsibilities, restriction in participation in the society, Preference of a boy over girl and so on. Still, there are some common solution against above challenges like education through mass communication, enhancing status of women in notified area (areas where women are oftenly crushed), through NGOs, Government Agencies and field workers.
